The AIFM’s supervisory authority in relation to this Key Information Document is the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – BaFin).

Date of production of the Key Information Document: 14 October 2021.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

Limited partnership interest in the Fund, a closed-ended private equity fund in form of a German limited partnership (*Kommanditgesellschaft, GmbH & Co. KG*).

Objectives

Long-term capital appreciation through the Fund’s investments in equity and equity-related primary and secondary investments in Quantilope GmbH, Hamburg (Germany), registered with the commercial register at the lower court of Hamburg (Germany) under registration No. HRB 132952 (the „**Portfolio Company**“).

The fund return is, among other factors, dependent on whether the Portfolio Company can be sold with profit after a mid- to long-term holding period; and on the development of the Portfolio Company. The investors receive distributions from the Fund only if the Fund obtains liquid proceeds from its investments, provided that such proceeds are not reduced or exhausted by reinvestments, costs, or remuneration for the AIFM or carried interest of the Senovo Team SPV I GmbH & Co. KG.

Intended retail investor

Fund return is calculated based on the internal rate of return (IRR)ⁱⁱ.
Semiprofessional investors within the meaning of the Art. 6(1)(a) and (b) of the EuVECA-Regulation, who normally have to commit capital in the amount of no less than EUR 100,000, are able to sustain total loss of the investment, willing to commit to a long-term investment, and have sufficient experience with private equity funds.

Term of the PRIIP

The required minimum holding period is at least 10 years from the Fund’s final closing, plus the duration of the liquidation of the Fund and an extension of the term of the Fund by up to two one year periods, provided that the fund is not terminated earlier.ⁱ The investor is not entitled to unilaterally withdraw from or give notice to the Fund except for good cause. The Fund has no maturity date, the AIFM is not entitled to terminate the Fund unilaterally and an automatic possibility to give notice does not exist. Disposition of interest in the Fund and termination of the Fund prior to the expiry of its term is only possible in those cases expressly provided for in the Fund’s limited partnership agreement.

What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 10 years after the final closing of the Fund.ⁱ The actual risk can vary significantly if you cash inⁱ at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified

this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact our capacity to pay you. The risk indicator does not take into account that key persons might withdraw from the AIFM and that other investors' default might affect the Fund's diversification. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

Investment EUR 10,000 ⁱⁱ Scenarios		1 year ⁱ	5 years ⁱ	10 years ⁱ
Stress scenario	What you might get back after costs Average return each year	EUR 0 -100% p.a.	EUR 0 -84% p.a.	EUR 0 -60% p.a.
Unfavourable scenario	What you might get back after costs Average return each year	EUR 6.690 -30% p.a.	EUR 2.349 -25% p.a.	EUR 0 -60% p.a.
Moderate scenario	What you might get back after costs Average return each year	EUR 9.660 -3% p.a.	EUR 13.445 6% p.a.	EUR 20.959 8% p.a.
Favourable scenario	What you might get back after costs Average return each year	EUR 10.480 5% p.a.	EUR 20.555 16% p.a.	EUR 50.103 18% p.a.

This table shows the money you could get back over the next 10 years under different scenarios,ⁱ assuming that you invest EUR 10,000ⁱⁱ. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment variesⁱⁱⁱ, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. Your maximum loss would be that you will lose all your investment. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the required minimum holding periodⁱ. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the AIFM is unable to pay out?

The Fund's assets are legally separated from the AIFM's. A default of the AIFM (particularly due to insolvency) will not lead directly to a financial loss for you as an investor. But the Fund itself may fail to make payments (particularly due to insolvency). In this case, the AIFM will be unable to make payments on account of the Fund and, thus, you may face a financial loss. So your contributions will not be repaid. Beyond that, there is no compensation or guarantee scheme. No guarantee as to future performance of or future returns from the Fund can be given.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods.ⁱ They include potential early exit penalties. The figures assume you invest EUR 10,000ⁱⁱ. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment EUR 10,000 ⁱⁱ			
Scenarios	If you cash in after 1 year ^{Error!} Bookmark not defined.	If you cash in after 5 years ^{Error!} Bookmark not defined.	If you cash in after 10 years ^{Error!} Bookmark not defined.
Total costs	EUR 240	EUR 1.049	EUR 2.384
Impact on return (RIY) per year	2,4 %	1,6 %	1,2 %

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs^{iv}	Entry costs	0 %	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.
	Exit costs	n.a.	The impact of the costs of exiting your investment when it matures. ⁱ
Ongoing costs^{iv}	Portfolio transaction costs	0,5 %	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	1,0 %	The impact of the costs that we take each year for managing your investments.
Incidental costs^{iv}	Performance fees	n.a.	We take no performance fee from your investment.
	Carried interests	10 %	The impact of carried interests we will pay to Senovo Team SPV I GmbH & Co. KG, if a preferred return of 6 % will be achieved.

How long should I hold it and can I take money out early?

Required minimum holding period

10 years from the Fund's final closing

The required minimum holding period is 10 years from the Fund's final closing which is the Fund's regular term. In case you subscribe prior to the Fund's final closing, your actual holding period may exceed 10 years. Additionally, the Fund's regular term might be subject to extension up to two one-year periods. The Fund is only fully terminated after the end of its liquidation phase, which follows the end of the Fund's term. The Fund may only exceptionally be terminated prior to the end of its term pursuant to the Fund's limited partnership agreement. A transfer of limited partnership interest will require the prior written consent of the AIFM. There exists no liquid market for limited partnership interest in the Fund, so that you might not be able to find a buyer or receive a purchase price less than the capital drawn and paid up. As consumer you have a right of revocation with regard to your limited partnership interest. Please refer to the consumer revocation instruction in the subscription booklet. You may not give notice to and withdraw from the Fund except where this is permitted under mandatory law for extraordinary reasons. As a consequence, you may not be permitted to disinvest and cash in prior to the end of the Fund's liquidation phase.

How can I complain?

Please direct any complaints about the product and conduct of the AIFM or the person selling you or advising you about this product in writing or in text form to:

- the AIFM to Senovo Capital Management GmbH, Leopoldstraße 23, 80802 München or investor@senovo.vc; and/or
- the BaFin (Bundesanstalt für Finanzdienstleistungsaufsicht, Graurheindorfer Straße 108, 53117 Bonn; E-Mail: poststelle@bafin.de; internet: <https://www.bafin.de>).

Other relevant information

For further information please consult the following Fund documents which we provide upon request: the limited partnership agreement, the additional information memorandum and the subscription booklet together with any annexes thereto.

ⁱ The scenarios presented in this Key Information Document are mandatory due to legal requirements. Please note that the Fund is a closed-ended Alternative Investment Fund (AIF). This means that notice and termination of your interest in the Fund or a return of such interest (also referred to as "exit" or "cash in") is possible only in those cases mandatorily required by law. A transfer of the Fund's limited partnership interest will require the prior written consent of the AIFM. Usually, this implies that your interest in the Fund will only end after liquidation of the Fund is completed (full termination). Where this Key Information Document contains calculations for the early termination or cash-in of interest in the Fund (i.e. notice or return) prior to full termination of the Fund, these are purely hypothetical scenarios.

ⁱⁱ The assumed investment of EUR 10,000 in this Key Information Document is a purely hypothetical figure only for calculatory purposes; such figure does not alter the minimum capital commitment of EUR 100,000. The calculation of the return is based on the internal rate of return method (IRR). The calculation of the return is based on the assumption that the hypothetical capital commitment of EUR 10,000 is bound in the product from the Fund's first closing to the expiry of the respective period. The performance scenarios are based on estimates of the AIFM. Actual performance may differ from these estimates.

ⁱⁱⁱ This half-sentence is mandatory due to legal requirements. The following is true: The scenarios presented in this Key Information Document are based on estimates of the AIFM in respect of a future increase in value of the investments, i.e. irrespective of former investments. The actual performance may deviate from the information presented in this Key Information Document.

^{iv} The costs applied in this section are estimates of the AIFM. Actual costs may be higher or lower.
